

## GLIDING WINDOWS

Andersen® 400 Series gliding windows feature a dual-operating sash which allows for increased ventilation options with a more contemporary look. Exteriors use two levels of protection from the elements. The frames and sill are constructed of a fiberglass-reinforced composite and the sash exterior is completely encased in vinyl. On the inside you have the choice of natural pine or low-maintenance white. For added style there is a wide range of grilles and hardware finish options.

### DURABLE

- Virtually maintenance-free
- Perma-Shield® exteriors never need painting and won't peel, blister, flake or corrode\*
- Frame and sill are protected by a tough fiberglass reinforced composite that repels water and provides long-lasting protection
- Wood sash members are treated with a water-repellent preservative

### ENERGY EFFICIENT

- Weather-resistant construction for greater comfort and energy efficiency
- Weatherstripping is designed to seal out drafts, wind and water
- A variety of Low-E4® glass options are available to control heating and cooling costs in any climate
- Many 400 Series Gliding Windows have options that achieve ENERGY STAR® version 6.0 certifications in all 50 states\*\*

### BEAUTIFUL

- Seven exterior color options
- Natural pine or white interiors
- Extensive hardware finish options
- Add style with grilles, exterior trim or patterned glass

### EXTERIOR COLORS

White Canvas Sandtone Terratone Forest Green Dark Bronze Black<sup>1</sup>
